# **User Manual**

**(Version 1.2.3)**

FOR RT830A

A graphic at the bottom of the page with a blue and white background. It features the word 'technology' in large, white, lowercase letters on a dark blue diagonal band. To the right, the word 'time' is written vertically in a smaller font. In the bottom right corner, the 'RTscan' logo is visible. The background is decorated with faint, glowing blue lines and gear-like patterns.

# 1 Getting Started

---

## 1.1 About This Guide

This guide provides programming instructions for the RTscan 2D Barcoder Readers: RT860. Users can configure the RTscan 2D Barcoder Reader by scanning the programming barcodes included in this manual.

With the button in the top of the scanner, we can do some quick setup to switch to scanner among: Normal Scan (read print code, cell phone screen code, 1d /2d), 1D fast scan (optimized for 1d quick scanning), Disable scan; please refer to the Quick Start Guide which included in the scanner package.

## 1.2 Barcode Scanning

RTscan 2D Barcoder Reader outstanding in fast scanning and decoding accuracy. Barcodes rotated at any angle can still be read with ease. When scanning a barcode, simply make the bar code face to the scanning window and the scanner will automatically detect and read the code quickly.

## 1.3 Factory Defaults

Scanning the following barcode can restore the scanner to the factory defaults.

**Note:** Use this feature with discretion.

0D0100.

Restore All Factory Defaults

## 2 Communication Interfaces

---

---

## 2.1 USB COM Port Emulation

With USB interface, scan the USB COM Port Emulation setting code allows the Host to receive data in the way as a serial port does. A driver is required for this feature.

Default serial communication parameters are listed below. Make sure all parameters match the host requirements.

Parameter	Factory Default
Baud Rate	9600
Parity Check	None
Data Bits	8
Stop Bits	1
Hardware Flow Control	None

## 2.2 Baud Rate

Baud rate is the number of bits of data transmitted per second. Set the baud rate to match the Host requirements.

0607023.  
2400

0607024.  
4800

0607025.  
9600

0607026.  
19200

0607027.  
38400

0607028.  
57600

0607029.  
115200 (Default)

## 2.3 Data Bit & Parity Check & Stop Bit

**Note:** some products only allows default configuration (None Parity/8 Data Bits/1 Stop Bit), configuration command: 0607032;  
If products do not support multiple configurations, scanning the bar code of non-default configuration would error beep.

0607032.

---

None Parity /8 Data Bits/1 Stop Bit (Default)

0607030.

None Parity /7 Data Bits/1 Stop Bit

0607031.

None Parity /7 Data Bits/2 Stop Bits

0607035.

Even Parity /8 Data Bits/1 Stop Bit

0607033.

Even Parity /7 Data Bits/1 Stop Bit

0607034.

Even Parity /7 Data Bits/2 Stop Bits

0607038.

Odd Parity /8 Data Bits/1 Stop Bit

0607036.

Odd Parity /7 Data Bits/1 Stop Bit

0607037.

Odd Parity /7 Data Bits/2 Stop Bit

## 2.4 USB HID-KBW

When you connect the scanner to the Host via a USB connection, you can enable the **USB HID-KBW** feature by scanning the barcode below. Then scanner's transmission will be simulated as USB keyboard input. The Host receives keystrokes on the virtual keyboard. It works on a Plug and Play basis and no driver is required.

090500.  
USB HID-KBW (Default)

## 2.5 USB Country Keyboard Types

Keyboard layouts vary from country to country. The default setting is 1-U.S. keyboard.

060E000.  
1 - U.S. (Default)

060E007.  
2 - UK

060E008.  
3 - Denmark

060E003.  
4 - France

060E002.  
5 - Finland

060E0027.  
6 - Turkey\_F

060E005.  
7 - Italy

060E0035.  
9 - Albania

060E0033.  
11 - Bosnia

060E0032.  
13 - Croatia

060E0011.  
15 - Dutch

060E004.  
17 - Germany

060E009.  
8 - Norway

060E001.  
10 - Belgium

060E0016.  
12 - Brazil

060E0015.  
14 - Czech

060E0041.  
16 - Estonia

060E0019.  
19 - Hungary

060E0042.  
21 - Latvia

060E0034.  
23 - Macedonia

060E0020.  
25 - Poland

060E0025.  
27 - Romania

060E0017.  
18 - Greek

060E0073.  
20 - Irish

060E0044.  
22 - Lithuania

060E0010.  
24 - Spain

060E0013.  
26 - Portugal

060E0026.  
28 - Russia

060E0028.  
29 - Japan

---

## 2.6 Convert Case

Scan the appropriate barcode below to convert barcode data to your desired case.

060D020.

No Case Conversion (Default)

060D021.

Convert All To Upper Case

060D022.

Convert All To Lower Case

**Example:** When the **Convert All to Lower Case** feature is enabled, barcode data "AbC" is transmitted as "abc".

## 2.7 RS232 Interface

For all of Default serial communication parameters and baud rate setting, same with above for "USB COM Port Emulation"

---

## 3 General Configuration

### 3.1 Good Read Beeper

0502101.  
ON (Default)

0502100.  
OFF

### 3.2 Good Read Beeper Volume

05021D1.  
Low

05021D2.  
Middle

05021D3.  
High (Default)

### 3.3 Good Read Beeper Duration

0502160.  
Normal (Default)

0502161.  
Short

---

## 3.4 Good Read Beeper Tone

05020D1680.

Low Frequency

05020D2790.

Medium Frequency (Default)

05020D3280.

Medium High Frequency

05020D4290.

High Frequency

## 3.9 Presentation Mode Reread Delay

080B06500.

Delay 500 MS (Default)

080B06750.

Delay 750 MS

080B061000.

Delay 1000 MS

---

## 4 Data Formatting

### 4.1 General Configuration

090200.  
Add CR

090202.  
Add LF

090300.  
Add CRLF

090201.  
Add TAB

---

## 4.2 Add Prefix

080400.  
Set Custom Prefix

0D0400.  
Save

0D0500.  
Not Save

To set a customer prefix, scan the **Set Custom Prefix** barcode and the numeric barcodes which representing the hexadecimal values of a desired prefix, and then scan the **Save** barcode. Refer to [Appendix 2](#): ASCII Table for hexadecimal values of characters.

Example: Set the custom Prefix to "ODE"

1. Check the hex values of "ODE" in the ASCII Table. ("ODE": 4F, 44, 45)
2. Scan the **Set Custom Prefix** barcode.
3. Scan the numeric barcodes "9", "9", "4", "F", "4", "4", "4" and "5" in [Appendix 3](#).
4. Scan the **Save** barcode.

## 4.3 Add Suffix

080500.

Set Custom Suffix

0D0400.

Save

0D0500.

Not Save

To set a customer suffix, scan the **Set Custom Suffix** barcode and the numeric barcodes which representing the hexadecimal values of a desired suffix, and then scan the **Save** barcode. Refer to [Appendix 2](#): ASCII Table for hexadecimal values of characters.

Example: Set the custom Suffix to "ODE"

1. Check the hex values of "ODE" in the ASCII Table. ("ODE": 4F, 44, 45)
2. Scan the **Set Custom Suffix** barcode.
3. Scan the numeric barcodes "9", "9", "4", "F", "4", "4", "4" and "5" in [Appendix 3](#).
4. Scan the **Save** barcode.

## 4.4 Clear All Prefix and Suffix

080404.

Clear All Prefix And Suffix (Default)

---

## 5 Symbologies

### 5.1 General Setting

#### 5.1.1 Restore Symbology Default Setting

090101.

Restore Symbology Default

**Symbologies Enable:**

Code 128, Code 39, UPC, EAN, Interleaved 2 of 5, Code 93, Coda Bar, GS1-128, Data Matrix, PDF417, QR, Maxi Code, Aztec.

#### 5.1.2 Optimize Performance for Retail Use Case

Make for optimize scan performance in most retail barcode scan use case.

**Symbologies Enable:**

UPC, EAN, Code128, QR, PDF417.

091832.

Only Enable Retail Barcode

#### 5.1.3 Enable/Disable All Symbologies

If the **Disable All Symbologies** feature is enabled, the scanner will not be able to read any non-programming barcodes except the programming barcodes.

0201001.

Enable All Symbologies

0201000.

Disable All Symbologies

---

## 5.2 1D Symbolies

### 5.2.1 Code 128

Enable/Disable Code 128

020A011.  
**Enable Code 128 (Default)**

020A010.  
**Disable Code 128**

#### Message Length

Message length can be set to the maximum value or minimum value. The value between the maximum and the minimum is valid.

The maximum value and minimum value can be set using “Programming Command”. Please check the programming command guide for the detail.

Code 128 max length command: 020A03. The parameter of this command can be set from min to 90.

Code 128 min length command: 020A02. The parameter of this command can be set from 0 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 020A0325 ; Min: 020A0210.

## 5.2.2 EAN-8

### Enable/Disable EAN-8

0214011.  
Enable EAN-8 (Default)

0214010.  
Disable EAN-8

### Transmit Check Digit

EAN-8 is 8 digits in length with the last one as its check digit used to verify the accuracy of the data.

0214021.  
Transmit EAN-8 Check Digit (Default)

0214020.  
Do Not Transmit EAN-8 Check Digit

### Add-On Code

An EAN-8 barcode can be augmented with a two-digit or five-digit add-on code to form a new one. In the examples below, the part surrounded by blue dotted line is an EAN-8 barcode while the part circled by red dotted line is add-on code.

0214031.  
Enable 2-Digit Add-On Code

0214030.

**Disable 2-Digit Add-On Code (Default)**

0214041.

**Enable 5-Digit Add-On Code**

0214040.

**Disable 5-Digit Add-On Code (Default)**

### Add-On Code Required

0214051.

**EAN-8 Add-On Code Required**

0214050.

**EAN-8 Add-On Code Not Required (Default)**

### ENA/JAN-8 Addenda Separator

When this feature is enabled, there is a space between barcode and addenda. When this feature is disabled, there is no space.

0214061.

**Enable ENA/JAN-8 Addenda Separator (Default)**

0214060.

**Disable ENA/JAN-8 Addenda Separator UPC**

---

## 5.2.3 EAN-13

### Enable/Disable EAN-13

0213011.  
**Enable EAN-13 (Default)**

0213010.  
**Disable EAN-13**

### Transmit Check Digit

0213021.  
**Transmit EAN-13 Check Digit (Default)**

0213020.  
**Do Not Transmit EAN-13 Check Digit**

### Add-On Code

0213031.  
**Enable 2-Digit Add-On Code**

0213030.  
**Disable 2-Digit Add-On Code (Default)**

0213041.  
**Enable 5-Digit Add-On Code**

0213040.  
**Disable 5-Digit Add-On Code (Default)**

---

### Add-On Code Required

0213051.

**EAN-13 Add-On Code Required**

0213050.

**EAN-13 Add-On Code Not Required (Default)**

### ENA/JAN-13 Addenda Separator

When this feature is enabled, there is a space between barcode and addenda. When this feature is disabled, there is no space.

0213061.

**Enable ENA/JAN-13 Addenda Separator (Default)**

0213060.

**Disable ENA/JAN-13 Addenda Separator**

### ISBN Translate

When enable this feature and is scanned, ENA-13 Book land symbols are translated into their equivalent ISBN number format.

0213071.

**Enable ISBN Translate**

0213070.

**Disable ISBN Translate (Default)**

---

## 5.2.4 UPC-E

Enable/Disable UPC-E0/E1

0212011.  
Enable UPC-E0 (Default)

0212010.  
Disable UPC-E0

0212021.  
Enable UPC-E1

0212020.  
Disable UPC-E1 (Default)

UPC-E0 Check Digit

0212041.  
Enable UPC-E0 Check Digit (Default)

0212040.  
Disable UPC-E0 Check Digit

---

## UPC-E0 Expand

UPC-E0 expand expands the UPC-E code to the 12 digits, UPC-A format.

0212031.  
Enable UPC-E0 Expand

0212030.  
Disable UPC-E0 Expand (Default)

## UPC-E0 Addenda Required

When required is scanned, the scanner will only read UPC-E barcodes that have addenda.

0212081.  
Enable UPC-E0 Required

0212080.  
Disable UPC-E0 Required (Default)

## UPC-E0 Addenda Separator

0212091.  
Enable UPC-E0 Separator (Default)

0212090.  
Disable UPC-E0 Separator

---

## UPC-E0 Number System

The number system digit of UPC symbol is normally transmitted at the beginning of the scanned data, but the unit can be programmed so it will be not transmitted.

0212051.

**Enable UPC-E0 Number System (Default)**

0212050.

**Disable UPC-E0 Number System**

## UPC-E0 Addenda

0212061.

**Enable 2 Digit Addenda**

0212060.

**Disable 2 Digit Addenda (Default)**

0212071.

**Enable 5 Digit Addenda**

0212070.

**Disable 5 Digit Addenda (Default)**

---

## 5.2.5 UPC-A

### Enable/Disable UPC-A

0211011.  
**Enable UPC-A (Default)**

0211010.  
**Disable UPC-A**

### UPC-A Check Digit

0211021.  
**Enable UPC-A Check Digit (Default)**

0211020.  
**Disable UPC-A Check Digit**

### UPC-A Addenda Required

When required is scanned, the scanner will only read UPC-E barcodes that have addenda.

0211061.  
**Enable UPC-A Required**

0211060.  
**Disable UPC-A Required (Default)**

---

## UPC-A Addenda Separator

0211071.

**Enable UPC-A Separator (Default)**

0211070.

**Disable UPC-A Separator**

## UPC-A: Number System

The number system digit of UPC symbol is normally transmitted at the beginning of the scanned data, but the unit can be programmed so it will be not transmitted.

0211031.

**Enable UPC-A Number System (Default)**

0211030.

**Disable UPC-A Number System**

---

## UPC-A: Addenda

0211041.  
Enable 2 Digit Addenda

0211040.  
Disable 2 Digit Addenda (Default)

0211051.  
Enable 5 Digit Addenda

0211050.  
Disable 5 Digit (Default)

---

## 5.2.6 Interleaved 2 Of 5

Enable/Disable Interleaved 2 Of 5

0204011.

**Enable Interleaved 2 Of 5 (Default)**

0204010.

**Disable Interleaved 2 Of 5**

### Message Length

Message length can be set to the maximum value, minimum value. The data between the maximum and the minimum is valid.

The maximum value and minimum value can be set using Programming Command. Please check the programming command guide for the detail.

Interleaved 2 of 5 max length command: 020404. The parameter of this command can be set from min to 80.

Interleaved 2 of 5 min length command: 020403. The parameter of this command can be set from 2 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 02040425 ; Min: 02040310.

### Interleaved 2 Of 5 Check Digit

0204020.

**No Check Char (Default)**

0204022.

**Validate And Transmit**

0204021.

**Validate Not Transmit**

---

## 5.2.7 Matrix 2 Of 5

Enable/Disable Matrix 2 Of 5

0208011.  
**Enable Matrix 2 Of 5**

0208010.  
**Disable Matrix 2 Of 5 (Default)**

### Message Length

Message length can be set to the maximum value, minimum value. The value is valid between the maximum and the minimum.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

Matrix 2 of 5 max length command: 020803. The parameter of this command can be set from min to 80.

Matrix 2 of 5 min length command: 020802. The parameter of this command can be set from 1 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 02080325 ; Min: 02080210.

---

## 5.2.8 Industrial 2 Of 5

Enable/Disable Industrial 2 Of 5

0206011.

**Enable Industrial 2 Of 5**

0206010.

**Disable Industrial 2 Of 5 (Default)**

### Message Length

Message length can be set to the maximum value, minimum value. The value is valid between the maximum and the minimum.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

Industrial 2 of 5 max length command: 020603. The parameter of this command can be set from min to 48.

Industrial 2 of 5 min length command: 020602. The parameter of this command can be set from 1 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 02060325 ; Min: 02060210.

---

## 5.2.9 Code 39

Enable/Disable Code 39

0203011.  
Enable Code 39 (Default)

0203010.  
Disable Code 39

Transmit Start/Stop Character

0203051.  
Transmit Start/Stop Character

0203050.  
Do Not Transmit Start/Stop Character (Default)

Code 39 Check Character

0203040.  
No Check Char (Default)

0203042.  
Validate And Transmit

0203041.  
Validate No Transmit

## Code 39 Append

This function allows the scanner to append several Code 39 barcode data together before transmitting to host. When the scanner encounters a Code 39 barcode with append character (ex. Space character), it buffers the data until it reads a Code 39 barcode which does not have append character. Then the data is transmitted in the order that the barcodes were read.

0203031.  
**Enable Append**

0203030.  
**Disable Append (Default)**

## Code 39 Full ASCII

0203021.  
**Enable Code 39 Full ASCII**

0203020.  
**Disable Code 39 Full ASCII (Default)**

## Message Length

Message length can be set to the maximum value, minimum value. The value is valid between the maximum and the minimum.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

Code 39 max length command: 020308. The parameter of this command can be set from min to 48.

Code 39 min length command: 020307. The parameter of this command can be set from 0 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 02030825 ; Min: 02030710.

---

## 5.2.10 Coda Bar

### Enable/Disable Coda Bar

### Message Length

Message length can be set to the maximum value, minimum value. The data between the maximum and the minimum is valid.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

Coda bar max length command: 020206. The parameter of this command can be set from min to 60.

Coda bar min length command: 020205. The parameter of this command can be set from 2 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 02020625 ; Min: 02020510.

---

### Transmit Start/Stop Character

0202021.

**Transmit Start/Stop Character**

0202020.

**Do Not Transmit Start/Stop Character (Default)**

### Coda bar Check Character

0202030.

**No Check Char (Default)**

0202032.

**Validate And Transmit**

0202031.

**Validate No Transmit**

---

## 5.2.11 Code 93

### Enable/Disable Code 93

020D011.

**Enable Code 93 (Default)**

020D010.

**Disable Code 93**

### Message Length

Message length can be set to the maximum value, minimum value. The data between the maximum and the minimum is valid.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

Code 93 max length command: 020D03. The parameter of this command can be set from min to 80.

Code 93 min length command: 020D02. The parameter of this command can be set from 0 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 020D0325 ; Min: 020D0210.

### Code 93 Append

This function allows the scanner to append several Code 93 barcode data together before transmitting to host. When the scanner encounters a Code 93 barcode with append character (ex. Space character), it buffers the data until it reads a Code 93 barcode which does not have append character. Then the data is transmitted in the order that the barcodes were read.

020D051.

**Enable Code 93 Append**

020D050.

**Disable Code 93 Append (Default)**

---

## 5.2.12 GS1-128

Enable/Disable GS1-128

020B001.  
**Enable GS1-128 (Default)**

020B000.  
**Disable GS1-128**

### Message Length

Message length can be set to the maximum value, minimum value. The data between the maximum and the minimum is valid.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

GS1-128 max length command: 020B03. The parameter of this command can be set from min to 80.

GS1-128 min length command: 020B02. The parameter of this command can be set from 0 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 020B0325 ; Min: 020B0210.

---

## 5.2.13 MSI

### Enable/Disable MSI

020E011.  
Enable MSI

020E010.  
Disable MSI (Default)

### Message Length

Message length can be set to the maximum value, minimum value. The data is valid between the maximum and the minimum.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

MSI max length command: 020E04. The parameter of this command can be set from min to 48.

MSI min length command: 020E03. The parameter of this command can be set from 4 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 020E0425 ; Min: 020E0310.

---

## MSI Check Character

020E021.  
Validate Type10 Transmit

020E020.  
Validate 2 Type10 No Transmit (Default)

020E024.  
Validate Type10 Then Type11 Char NO Transmit

020E025.  
Validate Type10 Then Type11 Char Transmit

020E023.  
Validate 2 Type10 Char Transmit

020E022.  
Validate 2 Type10 Char No Transmit

020E026.  
Disable MSI Check

---

## 5.2.14 Code 11

Enable/Disable Code 11

0209011.  
Enable Code 11

0209010.  
Disable Code 11 (Default)

Code11 Check Digit(s)

0209040.  
One Check Digit

0209041.  
Two Check Digits (Default)

---

## 5.3 2D Symbologies

### 5.3.1 PDF 417

Enable/Disable PDF 417

021F011.  
**Enable PDF 417 (Default)**

021F010.  
**Disable PDF 417**

Enable/Disable Micro PDF 417

0220011.  
**Enable Micro PDF 417**

0220010.  
**Disable Micro PDF 417 (Default)**

#### Message Length

Message length can be set to the maximum value, minimum value. The data is valid between the maximum and the minimum.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

PDF417 max length command: 021F06. The parameter of this command can be set from min to 2750.

PDF417 min length command: 021F05. The parameter of this command can be set from 1 to max. Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 021F0625 ; Min: 021F0510.

## 5.3.2 QR Code

### Enable/Disable QR Code

0237011.

**Enable QR Code (Default)**

0237010.

**Disable QR Code**

### Message Length

Message length can be set to the maximum value, minimum value. The data is valid between the maximum and the minimum is valid.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

QR max length command: 023703. The parameter of this command can be set from min to 7089.

QR min length command: 023702. The parameter of this command can be set from 1 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 02370325 ; Min: 02370210.

### QR Code Append

This function allows the scanner to append several QR barcode data together before transmitting to host. When the scanner encounters a QR barcode with append character (ex. Space character), it buffers the data until it reads a QR barcode which does not have append character. Then the data is transmitted in the order that the barcodes were read.

0237081.

**Enable QR Code Append (Default)**

0237080.

**Disable QR Code Append**

---

### 5.3.3 Data Matrix

#### Enable/Disable Data Matrix

0236011.

**Enable Data Matrix (Default)**

0236010.

**Disable Data Matrix**

#### Message Length

Message length can be set to the maximum value, minimum value. The data is valid between the maximum and the minimum.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

Data Matrix max length command: 023603. The parameter of this command can be set from min to 3116.

Data Matrix min length command: 023602. The parameter of this command can be set from 1 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 02360325 ; Min: 02360210.

---

## 5.3.4 Maxi code

Enable/Disable Maxi code

0234011.  
Enable Maxi Code

0234010.  
Disable Maxi Code (Default)

### Message Length

Message length can be set to the maximum value, minimum value. The data is valid between the maximum and the minimum.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

Maxi Code max length command: 023403. The parameter of this command can be set from min to 150.

Maxi Code min length command: 023402. The parameter of this command can be set from 1 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 02340325 ; Min: 02340210.

---

## 5.3.5 Aztec

### Enable/Disable Aztec

0233011.  
**Enable Aztec (Default)**

0233010.  
**Disable Aztec**

### Message Length

Message length can be set to the maximum value, minimum value. The data is valid between the maximum and the minimum.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

Aztec max length command: 023306. The parameter of this command can be set from min to 3832.

Aztec min length command: 023305. The parameter of this command can be set from 1 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 02330625 ; Min: 02330510.

### Aztec Append

0233081.  
**Enable Aztec Append (Default)**

0233080.  
**Disable Aztec Append**

---

## 5.3.6 Hanxin

### Enable/Disable Hanxin

0238011.  
Enable Hanxin

0238010.  
Disable Hanxin (Default)

### Message Length

Message length can be set to the maximum value, minimum value. The data is valid between the maximum and the minimum.

The maximum value and minimum value can be set using Programming command. Please check the programming command guide for the detail.

Hanxin max length command: 023803. The parameter of this command can be set from min to 7833.

Hanxin min length command: 023802. The parameter of this command can be set from 1 to max.

Example: Set the Barcode Message length of the minimum value is 10; the maximum value is 25.

Programming command: Max: 02380325 ; Min: 02380210.

---

## 5.4 Postal Symbologies

### 5.4.1 China Postal Code

Enable/Disable China Postal Code

0218011.

**Enable China Postal Code**

0218010.

**Disable China Postal Code (Default)**

### 5.4.2 Telepen

Enable/Disable Telepen

0210011.

**Enable China Telepen**

0210010.

**Disable China Telepen (Default)**

## 6 Q&A

### 6.1 How to scan Japanese in QR codes?

Application environment	QR coding rule	
	UTF8\GB2312	Shift-JIS
word documents	 091842.	 091840.
Excel or notepad system languages:JP	 091846.	 091845.
Sample Code	 こんにちは	 123 あいうえ ABC かきくけこ 456

## 6.2 How to scan Korean in QR codes?

application environment	QR coding rule	
	UTF8	CP949
word documents	 091842.	 091844.
Excel or notepad system languages:Korean	 09184B.	 09184A.
Sample Code	 안녕하세요	 123바깥쪽크다   트.채ㅍㅍ

## 6.3 How to scan Thai in QR codes?

Application environment	QR coding rule	
	UTF8	CP874
word documents	 091842.	 091843.
Excel or notepad system languages:Thai	 09184D.	 09184C.
Sample Code	 <b>แบบทดสอบภาษาไทย</b> <b>บาร์โค้ด</b>	 <b>12345678 ห ฟ ด</b> <b>ดาสกหพร้า แส่ส KTB</b> <b>CO.,LTD</b>

## 7 Appendix

### 7.1 Appendix 1: AIM ID Table

Symbology	AIM ID	Remark
EAN-13	]E0	Standard EAN-13
	]E3	EAN-13 + 2/5-Digit Add-On Code
